

Emergency Strap on Tire Chains

ALWAYS CHECK DISC BRAKE CLEARANCE BEFORE USING STRAP ON TIRE CHAINS!!!!

1. Pass the strap through the holes in rim.(as shown) and position the chain in the middle of the tire tread.

2. Pull the strap tight through the guide (on the outside of the tire) and fold over the locking plate to secure the strap.

READ FIRST!!!

**MUST be installed as tight as possible!!
ONLY to be used for short distances.
For example, a parking lot or driveway.
DO NOT SPIN OR EXCEED 5 MPH.**
